

BATTERY ELECTRIC PUMPS FOR DIESEL FUEL TRANSFER

Battery electric vane self-priming pump 12 or 24V direct electricity, constituted by cast iron body, sintered steel impeller and acetyl resin vane. Built-in by-pass valve and stainless steel filter.

Battery electric pump 60 l for diesel transfer equipped with:

Power cable 4 m lenght sec. 4 mmq with pincers and fuse

Self-priming rotary electric pump

Cast iron body

By-pass valve

DC Engine

Stainless steel filter 100 micron

Motor protection rating IP55
